Art Unit: 3736

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 - 9, drawn to a method to obtain information related to physiological conditions of a patient, classified in class 600, subclass 310.
  - II. Claims 10 - 17, drawn to a method of assessing presence of motion artifact in time domain plethysmographic signals, classified in class 600, subclass 336.
  - III. Claims 18 - 28, drawn to a method of processing plethysmographic signals including obtaining and comparing three different estimates of oxygen saturation, classified in class 600, subclass 323.
  - IV. Claims 29 - 36, drawn to a method of processing plethysmographic signals to obtain a perfusion index, classified in class 600, subclass 481.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a method for correcting measurements of an ambulatory patient, invention III has separate utility such as a method for apnea monitoring, and invention IV has separate utility such as a method for monitoring a surgical patient. See MPEP§ 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Robert Berube on 14 April 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric F Winakur whose telephone number is 571/272-4736. The examiner can normally be reached on M-Th, 7:30-5; alternate Fri.
